

鯖石川・八重沢川・鬼沢川・塩沢川/高柳1

- ① 自宅や職場を見つける
- ②     に入っているか確認する
- ③ 一番近い指定緊急避難場所・指定避難所  
() ()を確認する  
※建物の鍵は開いていない場合があります。
- ④   までの避難経路を確認する

The diagram illustrates evacuation procedures for buildings of different heights relative to water levels. It is divided into three horizontal sections by dashed lines:

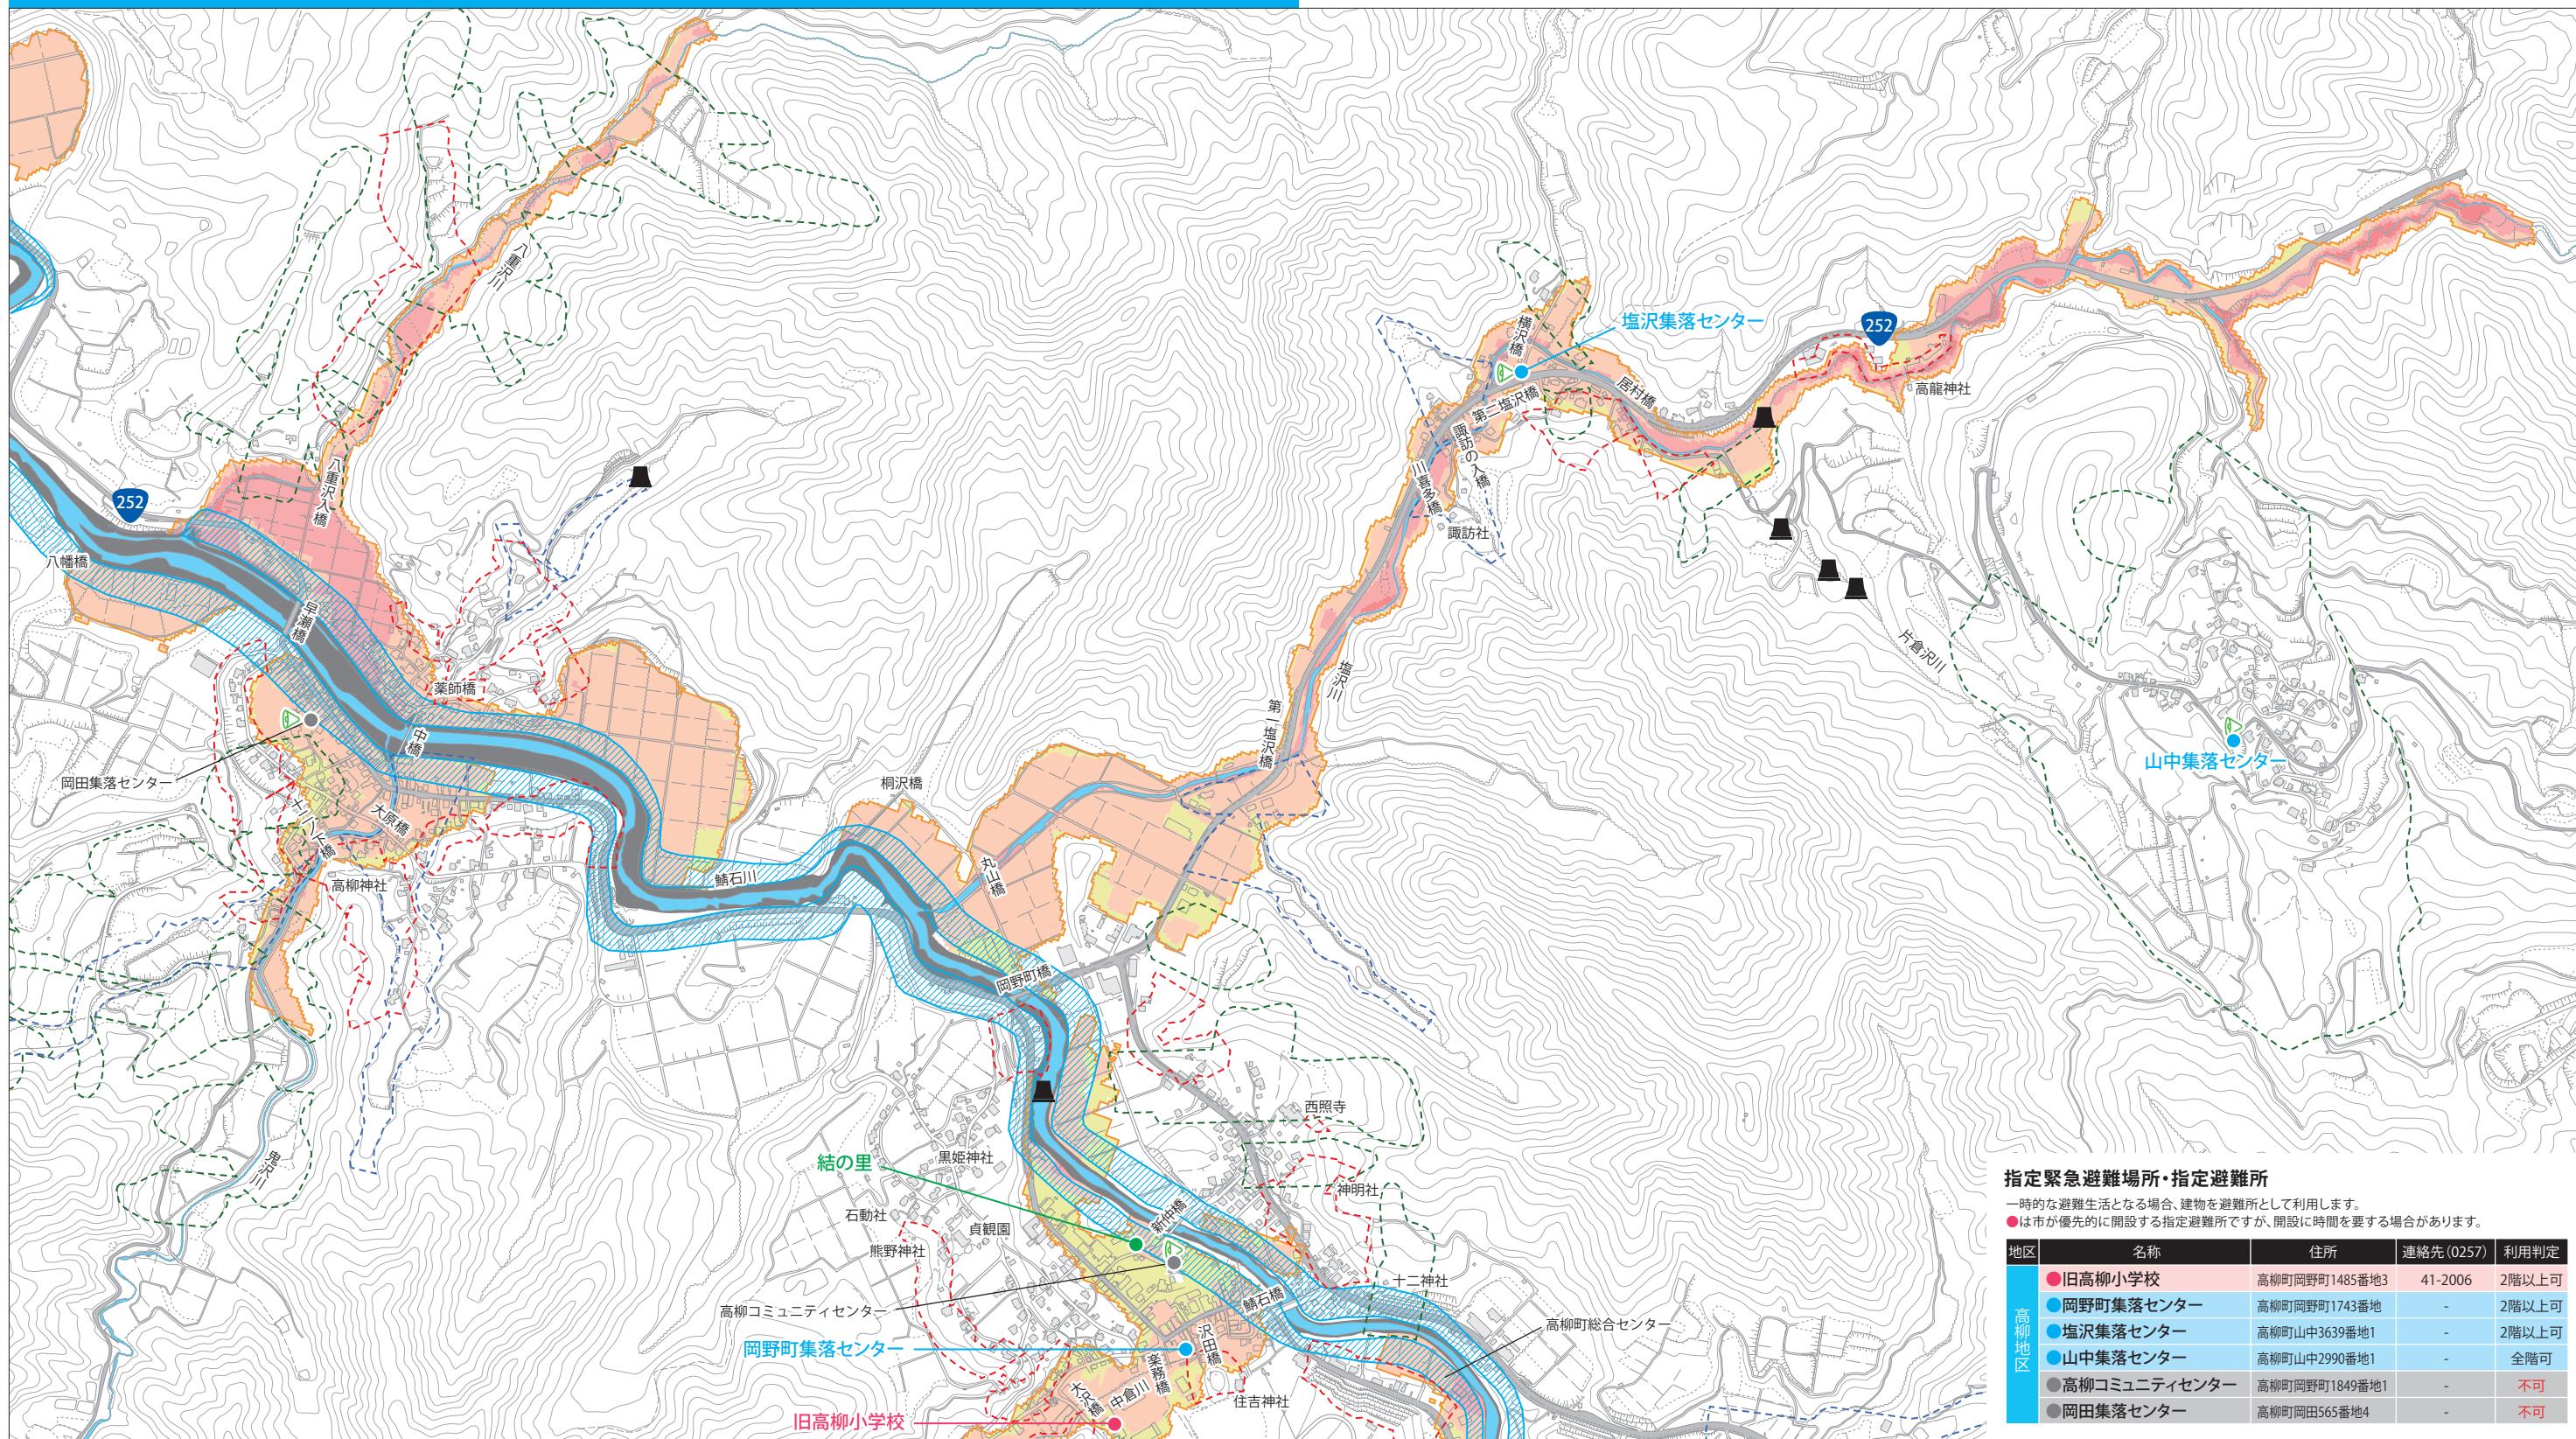

- Top Section (10.0m ~ 20.0m):** Labeled "5.0 ~ 10.0m (ヒルの3階まで浸水)". It shows a building with a square window. A red box indicates the evacuation location is "3階以上へ" (To the 3rd floor or above).
- Middle Section (3.0 ~ 5.0m):** Labeled "(2階床上浸水)". It shows a building with a square window. A red box indicates the evacuation location is "2階以上へ" (To the 2nd floor or above).
- Bottom Section (0.5 ~ 3.0m):** Labeled "(1階床上浸水)". It shows a building with a square window and a silhouette of a person. A red box indicates the evacuation location is "2階以上へ" (To the 2nd floor or above).

Below the building silhouettes, there is a section labeled "(床下浸水)" (Basement flooding) with a red box indicating the evacuation location is "2階以上へ" (To the 2nd floor or above). At the very bottom, a red box labeled "0.5m未満" (Less than 0.5m) points to the ground level. A final note at the bottom states: "無理な避難は必要ありません。不安な場合は避難場所へ" (No unreasonable evacuation is necessary. In case of anxiety, please go to the evacuation site).

河岸が侵食された場合に、家屋の倒壊等の危険性がある区域の目安を示すものです。
